This email is in regards to the request to the commission to amend the certificate of need, the site permit and the route permit for the Plum Creek Wind Project. We think this is a very important project not only for the area but for the long term improvement for our renewable energy. It seems more urgent now to permit a project that has done a lot of necessary ground work. Because we have an administration that has talked about eliminating all the funding for these types of projects. Thank you.
