Mr. Daniel Wolf, Executive Secretary
Minnesota Public Utilities Commission
350 Metro Square Building
121 7th Place East
St. Paul, MN 55101-2147

Re: *The Commission's May 1, 2015 Request for Comments on Xcel's CSG Program*
Docket No. E-002/M-13-867

Dear Mr. Wolf:

The Office of Attorney General – Residential Utilities and Antitrust Division (“OAG”) submits this letter to the Commission’s request for comments on “all issues that require Commission action, including but not limited to changes to Commission Orders or Commission-approved tariffs,” in its Notice of Comment Period issued on May 1, 2015. The OAG’s April 30, 2015 comments are already largely responsive of the Commission’s request. In those comments, the OAG discussed several modifications to the CSG program that have been suggested by other parties—including changes to the bill credit rate and limits on co-locating gardens—to address the inequities of the program and the possible failure of the program to achieve its intended goals. The comments, however, were written with consideration given to the existing framework of the CSG program as set forth in the applicable statutes and past Commission orders. For instance, while the comments explained that adopting a variable rate for CSG bill credits could remedy some of the programs’ shortcomings, they noted that a variable rate was not consistent with how the Commission previously defined the Applicable Retail Rate. If the Commission intends to revisit its previous orders, these limitations may no longer apply.

The Commission should establish a process to develop a variable rate for the CSG program, and to couple the variable rate with a required minimum and maximum level of CSG integration for Xcel. The OAG has previously explained the merits of this model, which would allow the CSG program to achieve its intended goals while minimizing any negative effects on non-participants. The OAG also listed a variety of parameters that could be used to develop a variable rate.¹ Depending on the Commission’s specific goals, the method used to establish the variable rate may be simple or complex.

Despite the many benefits of a variable rate, establishing such a structure for CSG bill credits may be a time and resource intensive undertaking. For this reason, during the process of establishing the variable rate structure, the Commission should set a maximum level of annual

¹ See OAG’s April 30, 2015 comments at 22.

Mr. Daniel Wolf, Executive Secretary

Page 2

harm that it will permit from the CSG program.² The system should operate to prevent any material harm to non-participants.

Finally, the Commission should consider the CSG program holistically as it considers making changes to the program, since a change to one aspect of the program will have an impact on other aspects. For instance, as the OAG explained in its previous comments, the rate necessary to spur CSG developments is directly tied to the expected costs for developers—if the costs to developers can be reduced, then the bill credit rate can also be reduced to produce lower costs for non-participants while still maintaining an economically viable facility. Different parties, however, have made a variety of recommendations that would impact the cost to developers and the bill credit rate for subscribers. If considered in isolation, these recommendations may cause further problems to achieving the goals of the CSG program and minimizing the negative impacts on non-participants. Incorporation of a variable rate would seek to balance these competing factors, while making the program as effective as possible.

Sincerely,

s/ Ian Dobson

IAN DOBSON
Assistant Attorney General

(651) 757-1432 (Voice)
(651) 296-9663 (Fax)

² As stated in the OAG's April 30, 2015 comments at 23, "harm" could be defined at the point when the developer receives a final notice to proceed, and bill impacts could be calculated as in the DOC's February 24, 2015 Comments, among other ways.

LORI SWANSON
