Dear Lauren Agnew

Please enter into the public record my comment.

Because of what has been and is currently going on in our State of Minnesota regarding the huge amount of fraud being uncovered, the tensions on ICE operations, whether there will be funds from the Federal Government, there should be a moratorium put on the renewable projects at this moment.

Data Centers are being put on hold around our state in order to make a complete analysis before moving forward This is smart planning

There is too much uncertainty in our State with it's ability to fund such an expense of this nature at this time

I believe common sense is greatly needed here.

Please consider all the ramifications at this current time of approving such a project

Thank you again for your time and effort in this project

Sincerely

Susan Ferrozzo
