Dear PUC staff,

I am writing to request a hearing in the rulemaking you are conducting on Certificates of Need, Powerplant Siting, and Route Permits for High-Voltage Transmission Lines. I oppose the proposed amendments.

The PUC should update its rules to include mechanisms for incorporating climate change mitigation or adaptation into its decision-making processes. The most serious economic, social and human health challenge our state faces is effects from climate change. It must be considered in all major decisions. Therefore, the Commission must not do this update unless they also explicitly address climate change.

I request a hearing before an Administrative Law Judge.

Sincerely,
Dr. Laura Triplett
