In the Matter of Xcel Energy’s 2020–2034
Upper Midwest Integrated Resource Plan

DOCKET NO. E-002/RP-19-368

**RESPONSE OF THE OFFICE OF
THE ATTORNEY GENERAL TO
XCEL’S MOTION TO STRIKE**

INTRODUCTION

The Office of the Attorney General—Residential Utilities Division (“OAG”) files this Response to the motion of Xcel Energy (“Xcel” or “the Company”) to strike the OAG’s reply comments in the above-entitled matter. Xcel’s motion attempts to invoke its procedural due-process rights in an effort to exclude evidence that casts doubt on the reasonableness of the Company’s preferred resource plan. Specifically, Xcel claims that the OAG cannot refer the Commission to trade-secret data that the Commission already has from another utility, which suggests Xcel’s analysis is flawed.¹ Xcel claims that using this data to evaluate Xcel’s preferred plan would deprive the Company of a constitutionally protected property interest. This argument should be rejected. For the reasons explained below, the Company has no constitutionally protected interest in its preferred resource plan or in preventing a competitive bidding process, as the OAG has recommended. In addition, any minimal interest that the Company has in defending the specific resource plan it wants is far outweighed by the public benefit of allowing the Commission to broadly consider evidence from other utilities that contradict Xcel’s claims.

¹ While it has not explicitly stated so, Xcel’s argument suggests that the Commission cannot consider any information it received in other dockets, unless Xcel has access to that information.

Therefore, the use of trade-secret data does not implicate Xcel’s procedural due-process rights, and the Commission should deny the Company’s motion.

BACKGROUND

On July 1, 2019, Xcel filed a resource plan under Minnesota Statutes section 216B.2422. The filing outlined the Company’s preferred plan for meeting its customers’ energy needs in the 2020–2034 timeframe, including a proposal to construct a \$837 million, 800 MW combined-cycle power plant at the site of its existing Sherco power plant (“Sherco CC”). Xcel’s preferred plan was informed by its own future cost estimates of various potential resources.

On February 11, 2021, parties filed initial comments on Xcel’s resource plan. Several commenters recommended that the Commission not approve Xcel’s Sherco CC proposal because it would significantly and needlessly increase costs for customers and would expose them to greater risk, including volatile fuel costs, expected federal regulatory policies, and potentially lower than forecast market sales revenues

On June 25, 2021, the OAG filed reply comments. The OAG echoed other commenters’ concerns with the Sherco CC proposal. The OAG also relied on bid information obtained from Otter Tail Power Company (“Otter Tail’s trade-secret data”) to show that Xcel’s resource-plan assumptions overstate the cost of alternatives to the Sherco CC. The specific prices obtained in Otter Tail’s bid are trade secret. The OAG recommended that the Commission deny Xcel’s proposed Sherco CC and require the Company to complete a competitive bidding process to procure solar-plus-storage projects. Xcel has since proposed an alternative plan that would not include constructing the Sherco CC.

The OAG filed two copies of its reply comments: a “public” copy with trade-secret information redacted and a “protected” copy without redactions. The OAG also served Xcel with a copy of its reply comments that included Xcel’s trade secret information, but not Otter Tail’s.

The Commission’s docketing system prevents persons without permission, including Xcel, from viewing the protected version. Xcel asked the OAG for an unredacted copy of the reply comments, and the OAG in turn asked Otter Tail’s permission to disclose its trade-secret data to Xcel. Otter Tail declined to grant permission, and the OAG therefore was unable to satisfy Xcel’s request.

On August 13, 2021, Xcel filed its current motion. The Company asks the Commission to strike the OAG’s reply comments and require the OAG to refile them without reference to Otter Tail’s trade-secret data.

ANALYSIS

Xcel argues that using Otter Tail’s trade-secret data would deprive Xcel of procedural due process in violation of the Due Process Clause of the United States and/or Minnesota constitutions.² Xcel’s argument fails. Minnesota courts use a two-step analysis to determine whether state action violates an individual’s procedural due-process rights.³ Xcel has failed to show that the Commission would violate either of these steps if it considered the information it has about Otter Tail’s previous bids.

The first step is to determine whether the government has deprived the individual of a protected life, liberty, or property interest.⁴ A protected interest must be a “legitimate claim to entitlement,” not simply a “subjective expectancy” of receiving benefits.⁵ If the government’s action does not deprive an individual of a protected interest, then no process is due.⁶ If the government’s action does implicate a protected interest, the second step is to determine “whether

² See Minn. Const. art. I, § 7 (providing that “[n]o person shall . . . be deprived of life, liberty or property without due process of law”); U.S. Const. amend. V (same).

³ *Sawh v. City of Lino Lakes*, 823 N.W.2d 627, 632 (Minn. 2012).

⁴ *Id.*

⁵ *Bituminous Materials, Inc. v. Rice Cty., Minn.*, 126 F.3d 1068, 1070 (8th Cir. 1997); see also *Izaak Walton League of Am. v. Marsh*, 655 F.2d 346, 361 (D.C. Cir. 1981) (holding that railroad’s interest in avoiding competition was not property or liberty interest that created procedural due-process right).

⁶ *Sawh*, 823 N.W.2d at 632.

the procedures followed by the [government] were constitutionally sufficient.”⁷ Answering this second question requires balancing the public and private interests at stake, as well as considering the likely value of additional or substitute procedures.⁸

Xcel’s motion fails the first step of this constitutional analysis because the Company has no protected interest in its preferred resource plan. The purpose of integrated resource planning is to determine the optimal mix of supply- and demand-side resources to serve a utility’s customers and further the public interest.⁹ In other words, resource planning is undertaken not for the benefit of a utility or its shareholders but to further the public’s interest in reliable, affordable, and environmentally sound electric service. While Xcel may desire that the Commission approve its preferred plan, including the \$837 million Sherco CC proposal, this is not an outcome to which the Company is entitled, and therefore, its procedural due-process rights are not implicated. Likewise, while Xcel may not want to conduct a competitive bidding process for solar-plus-storage assets, it is not entitled to this outcome and does not have a property interest in it.

Even if Xcel could establish a property interest in its preferred resource plan, it has not fulfilled the second step of a due-process claim—showing that its private interests of having this data stricken outweigh the public benefits of having it available to the Commission. Xcel argues that the Commission’s use of Otter Tail’s trade-secret data would prejudice the Company.¹⁰ The Company’s argument is misplaced for two reasons. First, any prejudice that Xcel may face is minimal. Although Xcel does not know the *precise* amount of the Otter Tail bids, since this information is trade secret, it knows that they are *lower than* Xcel’s resource-plan assumptions.

⁷ *Id.* (quoting *Swarthout v. Cooke*, 562 U.S. 216, 219 (2011)).

⁸ *Id.* (citing *Mathews v. Eldridge*, 424 U.S. 319, 335 (1976)).

⁹ See Minn. Stat. § 216B.2422, subd. 2(a) (requiring the Commission to “approve, reject, or modify the [resource] plan of a public utility . . . consistent with the public interest”).

¹⁰ Xcel Mot. to Strike at 1.

Put differently, Xcel understands the arguments made by the OAG, and is free to present evidence to show that its higher assumptions are valid. Second, even if not knowing Otter Tail’s specific bid amounts hampered Xcel’s efforts to advocate for its preferred plan, the prejudice to the Company is minimal: As stated above, the only thing Xcel stands to lose in this case is its expectation of earning additional profits on a more expensive generation mix. And no matter the outcome, Xcel will have an opportunity to recover the costs of—and earn a profit on—any prudently-incurred investments that the Commission approves.

On the other hand, the public interest would be seriously harmed if the Commission could not consider relevant market data of a Minnesota utility based on Otter Tail’s unwillingness to disclose it to Xcel. Taken to its logical conclusion, Xcel’s position is that the Commission cannot rely on the information it gains through the experience of reviewing other utilities’ resource plans. Indeed, the OAG’s comments simply cited to information that the Commission *already has*. Xcel’s position is that the Commission cannot consider whether one utility is presenting costs that are outside the norm that it sees in other dockets, because it must ignore anything other utilities have presented. This would be extraordinarily harmful to the public interest. If the Commission cannot consider third-party utility bid data in resource-planning dockets merely because that data has been designated as confidential, there is a real risk that utilities’ efforts to put a thumb on the scale in favor of their preferred investments will go unchecked. The Commission should not lightly exclude evidence that bears directly on the reasonableness of Xcel’s assumptions and the cost-effectiveness of the Company’s preferred plan.¹¹

¹¹ The risk to ratepayers is particularly high in this case because, while attempting to keep Otter Tail’s information out of the record, Xcel has simultaneously declined to provide the OAG with *the Company’s own* trade-secret bid information. See Xcel response to OAG IR No. 4 (attached hereto as Exhibit A).

CONCLUSION

The Commission's duty in resource planning is to approve a plan that ensures that a utility can provide reliable, affordable, and environmentally sound service. The Commission is not setting Xcel's rates in this case, nor is the OAG advocating that the Company be denied a single cent of cost recovery. Xcel nonetheless argues that its expectation of increased profits from the approval of its preferred plan rises to the level of a constitutionally protected interest. The Company, however, does not have a constitutionally protected interest in building the most lucrative possible system. For these and all the foregoing reasons, the Commission should reject Xcel's effort to exclude Otter Tail's trade-secret bid data from the record.

Dated: August 27, 2021

Respectfully submitted,

KEITH ELLISON
Attorney General
State of Minnesota

 Public Document

Xcel Energy Information Request No. 4
Docket No.: E002/RP-19-368
Response To: Office of the Attorney General
Requestor: Andrew Twite
Date Received: July 7, 2021

Question:

Reference: Xcel's January 14, 2021 filings in Colorado PUC Docket No. 16A-0396E (Attachment 4 - 2016 Electric Resource Plan - Public Refile of 30-Day Report, Updated Attachment A): Xcel Colorado's 2017 all-source bidding solicitation received 28 bids for standalone battery storage projects and 79 bids for solar-plus-storage projects.

- A. Did the Company review the bids received in the 2017 Colorado solicitation in developing its Minnesota IRP battery storage cost inputs? If not, please explain why.
- B. Provide the levelized capacity cost (in \$/kW-month) and in-service date for the lowest bid received in the Colorado solicitation for a battery storage project with a duration of at least four hours.
- C. Provide the levelized capacity cost (in \$/kW-month) and in-service date for the lowest bid in the Colorado solicitation for a battery storage project with a duration of at least eight hours.
- D. Provide the levelized capacity cost (in \$/kW-month) for the storage component of the following solar-plus-storage bids received in the Colorado solicitation:
 - i. NextEra Thunder Wolf solar-plus-storage PPA (Bid ID X647)
 - ii. Coronel Piccadilly solar-plus-storage PPA (Bid ID X427)
 - iii. NextEra Neptune solar-plus-storage PPA (Bid ID X645)

Response:

- A. The Company used the general results of the 2017 Colorado solicitation as a basis for development of the storage assumptions in the original 2019 filing. At that time, the NREL Annual Technology Baseline (ATB) data for storage costs was not fully developed and did not provide enough credible data to support development of generic costs. NREL has since improved the quality of data provided in later versions of the ATB, and for the 2020 Supplement and 2021 Reply modeling, the

EXHIBIT A

Company used NREL data in the development of the generic costs. The Company believes the updated NREL data is currently the most credible source for generics resource costs for our Minnesota service territory.

- B. The publicly released information for the 2017 Colorado solicitation is included in this response as Attachments A and B. Due to the amount of time passed, the information in the attachments is fully public – the confidential markings can be disregarded. Most of the requested information can be found in these attachments, but the Company is unable to respond in further detail because it would reveal proprietary and confidential third-party information.
 - C. See the answer to subpart (B)
 - D. See the answer to subpart (B)

Table 2 - Generation Type Letter Codes

Letter Code	Generator Type
A	Compressed Air Storage
B	Biomass
C	Gas Combined Cycle
E	Battery Storage
G	Gas Combustion Turbine
I	Gas Internal Combustion
M	Other w/ Storage or fuel backup
O	Other
Q	Wind/Solar Hybrid
S	Solar PV
U	Wind w/ Storage
W	Wind
X	Solar w/ Storage
Y	CT w/ Storage

Table Notes:

A map of Energy Resource Zones (ERZ) 1 through 5 was provided in Figure 2.5-3 of ERP Volume 2, filed in Proceeding No.16A-0396E. If the bid is located within one of these zones, it is indicated in Table 1.

Four solar resource zones are identified in Table 1:

1. SFR – Southern Front Range
2. NFR - Northern Front Range
3. WS – Western Slope
4. SLV – San Luis Valley

In Table 1, solar resource zones are identified only for bids that included solar generation technology (e.g. solar, solar w/storage, wind w/solar, etc).

As discussed in Section 5 of this report, the review of generator interconnection costs focused on two categories of costs (1) interconnection facilities that will be owned by Public Service but funded by the generator, and (2) network interconnection facilities that will be funded and owned by Public Service. Table 1 includes a breakout of the second category of costs. This second category of costs is not embedded within the bid price but rather is assigned on a bid portfolio basis.

Table 2 provides a reference for discerning generation types from bid IDs referenced in Table 1.

The Office of
Minnesota Attorney General Keith Ellison
helping people afford their lives and live with dignity and respect • www.ag.state.mn.us

August 27, 2021

Mr. Will Seuffert
Executive Secretary
Minnesota Public Utilities Commission
121 7th Place East, Suite 350
St. Paul, MN 55101

Re: *In the Matter of Xcel Energy's 2020–2034 Upper Midwest Integrated Resource Plan*
MPUC Docket No. E-002/RP-19-368

Dear Mr. Seuffert:

Enclosed and e-filed in the above-referenced matter please find the Minnesota Office of the Attorney General—Residential Utilities Division’s Response to Xcel’s Motion to Strike.

By copy of this letter all parties have been served. A Certificate of Service is also enclosed.

Sincerely,

/s/ Max Kieley
MAX KIELEY
Assistant Attorney General

(651) 757-1244 (Voice)
(651) 296-9663 (Fax)
