

Staff Revised Motion (filed September 2, 2022)

Docket No. E015/M-19-337

Minnesota Power

In the Matter of Minnesota Power's Request to Extend its Commercial Electric Vehicle (EV) Rate Pilot

Staff proposes the following revised motion for the Commission for consideration at its September 8, 2022 agenda meeting. This reflects the entirety of the Department's recommendations in its July 21, 2022 Comments. The Department's recommendation to move the annual reporting date to June 1 on page 4 was left off the list of recommendations on page 5. Staff notes this does not change the Department's recommendations, and all docket participants¹ are in agreement with the recommendations.

1. Move to adopt the Department's recommendations as reflected in their July 21, 2022 comments:
 - Approve Minnesota Power's request to extend its Commercial EV Rate Pilot program until a new permanent offering is approved.
 - Approve Minnesota Power's request to file a permanent Commercial EV Rate no later than January 31, 2024.
 - Approve a negative check off process for uncontested modifications to Minnesota Power's EV programs by delegating authority to the Executive Secretary to approve, via notice, modifications to the pilot, if no stakeholder or Commission staff objects or files notice of objection within 30 days of the modification filing.
 - The Department recommends that the Commission move the date of the annual report for Minnesota Power's Commercial EV Rate Pilot program from December 12 to June 1, beginning with the annual report anticipated December 12, 2022. (Department July 21, 2022 comments, p. 4)
