Hwikwon Ham	Commissioner
Audrey C. Partridge	Commissioner
Joseph K. Sullivan	Commissioner
John A. Tuma	Commissioner

In the Matter of Detailing Criteria and Standards for Measuring a Utility's Good Faith Efforts in Meeting the Renewable Energy Objectives Under Minn. Stat. § 216B.1691	ISSUE DATE: July 2, 2026 DOCKET NO. E-999/CI-03-869
In the Matter of Utility Renewable Energy Cost Impact Reports Required by Minnesota Statutes Section 216B.1691, Subd. 2e	DOCKET NO. E-999/CI-11-852
In the Matter of an Investigation into Implementing Changes to the Renewable Energy Standard and the Newly Created Carbon Free Standard under Minn. Stat. § 216B.1691	DOCKET NO. E-999/CI-23-151 ORDER REVISING POLICIES FOR MODIFYING AND DELAYING IMPLEMENTATION OF STANDARDS UNDER MINN. STAT § 216B.1691 AND RELATED MATTERS

PROCEDURAL HISTORY

In 2001, the Minnesota Legislature adopted Minnesota's Renewable Energy Objectives. The statute directed each Minnesota electric utility—including investor-owned electric utilities, generation and transmission cooperatives, municipal power agencies, and power districts—to make a good-faith effort to acquire more electricity from renewable sources.[1] An accompanying statute (later consolidated with the Renewable Energy Objectives) provided for utilities to demonstrate compliance by acquiring and retiring tradable Renewable Energy Credits.[2]

In 2004, the Minnesota Public Utilities Commission (Commission) issued an order addressing how it would evaluate a utility's good-faith efforts to comply with the objectives in the new statute (2004 Order).[3]

---

[1] 2001 Minn. Laws, ch. 212, art. 8, sec. 3, codified at Minn. Stat. § 216B.1691.

[2] *Id*., sec. 2, codified at Minn. Stat. § 216B.169.

[3] *In the Matter of Detailing Criteria and Standards for Measuring a Utility's Good Faith Efforts in Meeting the Renewable Energy Objectives Under Minn. Stat. § 216B.1691*, Docket No. E-999/CI-03-869,

In 2007, the Legislature amended the Renewable Energy Objectives to provide for the Commission to modify or delay implementation of certain statutory obligations if doing so would be in the public interest whereas enforcing the obligations "would cause significant rate impact, requires significant measures to address reliability, or raises significant technical issues."[4] In 2010 the Commission issued an order that, among other things, provided guidance to parties seeking a modification or delay of the statutory obligations (2010 Order).[5]

In 2013, the Legislature directed the Commission to establish a system for utilities to estimate how much the implementation of the Renewable Energy Objectives would affect rates for electric service.[6] In 2015, the Commission issued an order establishing such a system (2015 Order).[7]

In 2023, the Legislature modified the Renewable Energy Objectives to, among other things, direct Minnesota utilities to comply with additional environmental standards including a Carbon-Free Standard.[8] The revised statute now authorizes the Commission to modify or delay implementing any of four sets of standards.

From August 2, 2023, to January 29, 2025, the Minnesota Large Industrial Group (MLIG) filed comments urging the Commission to revise its system for evaluating how the Renewable Energy Objectives affect utility rates.

On August 7, 2025, the Commission issued an order extending the period during which a utility may use certain tradable credits to demonstrate compliance with the Renewable Energy Objectives (August 2025 Order).[9]

On September 12, 2025, the Commission requested comments on whether it should revise or otherwise clarify its guidance for seeking modifications or delays to the Carbon-Free Standard.[10]

[9] *In the Matter of an Investigation into Implementing Changes to the Renewable Energy Standard and the Newly Created Carbon Free Standard under Minn. Stat. § 216B.1691*, Docket No. E-999/CI-23-151, Order Extending Credit Duration for Expedited Projects and Requiring Filings (August 7, 2025).

[10] *Id.*, Notice of Comment Period (September 12, 2025).

On September 16, 2025, the Commission issued an order (September 2025 Order)[11] that, among other things, did the following:

- Authorized utilities to demonstrate compliance with the Renewable Energy Objectives by retiring various kinds of tradable emissions credits, including Renewable Energy Credits, Alternative Energy Credits, and Environmental Attribute Credits.

- Authorized a utility to presume that a portion of the electricity it buys from the wholesale market (net of electricity sold into the market) comes from a carbon-free source, even if the utility did not know how the purchased electricity was generated.

- Specified that a utility may rely on such net market purchases to demonstrate partial compliance with the Carbon-Free Standard without having to retire tradable credits associated with the net market purchases.

From October 15 to December 4, 2025, the Commission received filings from the following parties in response to the Commission September 12, 2025 request:

- Central Municipal Power Agency/Services (CMPAS)
- The Clean Energy Organizations, Minnesota Center for Environmental Advocacy and Fresh Energy (CEOs)
- Great River Energy
- The Minnesota Department of Commerce, Division of Energy Resources (Department)
- Minnesota Power
- MLIG
- Northern States Power d/b/a Xcel Energy (Xcel)
- Otter Tail Power

On April 23, 2026, this matter came before the Commission.

FINDINGS AND CONCLUSIONS

I. Summary

In this order the Commission revises some prior decisions implementing the Renewable Energy Objectives. In particular, the Commission —

- addresses statutory changes,
- establishes policies governing any request to modify or delay the statute's requirements as applied to the Carbon-Free Standard,
- clarifies the expiration date for tradeable credits, and
- authorizes proceedings to reconsider its standards for evaluating how the revised Renewable Energy Objectives affect utility rates.

[11] *Id*., Order on Carbon-Free Standard—Clarifying Use of Credits, Net Market Purchases, and Reporting (September 16, 2025).

II. Legal Background—Renewable Energy Objectives and Standards

The State of Minnesota seeks to reduce the emission of greenhouse gases across all sectors of the economy emitting these gases.[12] In support of this goal, the Minnesota Legislature adopted and revised its Renewable Energy Objectives, Minn. Stat. § 216B.1691, to direct Minnesota's electric utilities to procure specified amounts of electricity from specified types of generation, and established deadlines for meeting these objectives. In particular, the statute establishes the following four standards:

- The Eligible Energy Technologies Standard (formerly known as the Renewable Energy Standard) currently directs each electric utility to acquire by 2035 sufficient electric energy from generators using certain "eligible energy technologies" to serve 55 percent of the energy demanded by the utility's retail customers in Minnesota.[13]

- The Solar Energy Standard, adopted in 2013, directs each public utility by 2020 to acquire sufficient solar energy to meet the needs of 1.5 percent of the energy bought by the utility's retail customers in Minnesota.[14]

- The Distributed Solar Energy Standard, adopted in 2023, directs each public utility to serve up to 3 percent of its electric loads with energy from small distributed solar energy systems.[15]

- Finally, the Carbon-Free Standard, adopted in 2023, directs a utility to acquire sufficient energy from "carbon-free" technologies to meet all of the needs of its Minnesota retail customers (or sometimes the utility's wholesale customers) according to the following schedule:

2030	80 percent for public utilities; 60 percent for other electric utilities
2035	90 percent for all electric utilities
2040	100 percent for all electric utilities.[16]

III. Need to Revise 2010 Order

A. Introduction

The Commission's 2010 Order provided guidance for anyone seeking to modify or delay the requirements of the Renewable Energy Objectives as they existed in 2010. The 2010 Order, Ordering Paragraphs 4-10, stated in part as follows:

---

[12] Minn. Stat. § 216H.02, subd. 1(a).

[13] Minn. Stat. § 216B.1691, subd. 2a.

[14] *Id.,* subd. 2f.

[15] *Id.,* subd. 2h.

[16] *Id.,* subd. 2g.

4. The Commission clarifies that a petition to modify or delay a Renewable Energy Standard may be filed at any time.

5. Any petition to modify or delay a Renewable Energy Standard shall include the following information: (a) a discussion of the reasons for concluding that compliance cannot be achieved by buying Renewable Energy Credits; (b) a plan for future compliance, as required under Minn. Stat. § 216B.1691, subd. 2b(c); and (c) the time frame within which the petitioner requests Commission action.

6. Petitions to modify or delay any Renewable Energy Standard shall comply with the service and filing requirements of Minnesota Rules 7829.1300 and, at least initially, follow the procedural track set forth in Minnesota Rules 7829.1400.

7. The Commission clarifies that it will use the proceedings and methods discussed in section V of this order [such as proceedings to review a utility's proposed resource plan, or to increase rates, or for authorization to build a large energy facility, or to approve an agreement to purchase power, or to obtain authorization to recover costs for transmission lines or renewable energy programs on an expedited basis] to track the rate and reliability effects of the Renewable Energy Objectives and Standards. The Commission will accept voluntary filings on the rate impact of the Renewable Energy Objectives and Standards in the biennial compliance reports filed by utilities not required to file resource plans.

8. The Commission clarifies that it favors forward-looking, long-term cost information when analyzing the rate impacts of the Renewable Energy Objectives and Standards but will not preclude other types of cost information from being presented by the parties.

9. The Commission clarifies that intervenors in a resource plan proceeding who request information related to the rate impact of future compliance with the Renewable Energy Standards are making a reasonable request for information under Minn. Rules, part 7843.0300, subp. 8, and that utilities must promptly respond.

10. The Commission clarifies that it will evaluate compliance with the Renewable Energy Standards on a case-by-case basis, but will also consider the factors set forth below:
    a. The factors articulated in [the 2004 Order] for evaluating compliance with the Renewable Energy Objectives.
    b. Whether the utility brought the noncompliance to the

attention of the Commission in a timely manner.

c. Whether Renewable Energy Credits are available for purchase, and at what price.

B. Comments and Commission Action

Various commentors offered suggestions for how, given the statutory changes, the Commission might revise its 2010 guidance for demonstrating compliance with the Renewable Energy Objectives. Based on these suggestions, the Commission will revise its guidance as follows.

1. Addressing standards beyond the Renewable Energy Standard

The seven ordering paragraphs from the 2010 Order address only the obligations associated with the Renewable Energy Standard/Eligible Energy Technologies Standard. Various commentors argued that these paragraphs would provide an appropriate starting point for addressing the other standards subject to modification or delay—specifically the Solar Energy Standard, Distributed Solar Energy Standard, and Carbon-Free Standard—and therefore recommended that the Commission apply these paragraphs to all four standards.

The Commission finds this recommendation reasonable and will adopt it as set forth in the ordering paragraphs below.

2. Addressing credits beyond Renewable Energy Credits

Likewise, various commentors noted that the 2010 Order reflects the state of the law in 2010, when the only kind of tradeable credit recognized by the Commission was the Renewable Energy Credit. For example, Ordering Paragraph 5 of the 2010 Order requires a petitioner seeking a modification or delay to explain why statutory compliance could not be achieved through the purchase of Renewable Energy Credits. And Ordering Paragraph 10 states that before granting the petition, the Commission will consider the availability and price of Renewable Energy Credits on the open market.

Minnesota Power and Xcel noted that the Commission's September 2025 Order now permits a utility to demonstrate compliance with the Carbon-Free Standard through the use of Renewable Energy Credits, Alternative Energy Credits, or Environmental Attribute Credits. In addition, Minnesota Power noted that the order authorized a utility to demonstrate partial compliance through reliance on net market purchases, without the need to use any accompanying credits. These commentors recommended that the Commission require anyone seeking a modification or delay to explain why compliance could not be achieved through the use of any of these tradeable credits or other equivalent carbon-free attributes allowed by statute or Commission order. These commentors further recommended that the Commission consider the availability and market price of such credits or attributes, where applicable.

The Commission finds these recommendations reasonable and will adopt them as set forth in the ordering paragraphs below. Likewise, whenever a petitioner seeks to modify or delay the terms of the Solar Energy Standard, the Commission will direct a petitioner to explain why compliance could not be achieved through the use of Solar Renewable Energy Credits.

3. Timing of request to modify or delay a standard

Ordering Paragraph 4 of the 2010 Order states that a petition to modify or delay may be made at any time. CEOs argued that petitions to modify or delay a standard should come only when it becomes clear that the utility will not be able to meet the standard, and that granting petitions prematurely would have the unwanted effect of removing a utility's incentive to keep trying to meet the standard.

The Commission acknowledges CEOs concerns and will bear them in mind. Nevertheless, the Commission will decline to prejudge when a request for modification or delay has become ripe. Rather, the Commission will address each petition's ripeness on a case-by-case basis.

4. Information to include with a petition for modification or delay

Ordering Paragraph 5 of the 2010 Order directs a petitioner seeking a modification or delay to file a plan for later achieving compliance under Minn. Stat. § 216B.1691, subd. 2b(c). Xcel noted that this part of the statute is now codified at subd. 2b(e). The Commission will revise its instructions to incorporate this revised citation.

5. Procedural requirements

Ordering Paragraph 6 of the 2010 Order directs anyone seeking to modify or delay application of the Renewable Energy Standard to "comply with the service and filing requirements of Minnesota Rules 7829.1300; and, at least initially, follow the procedural track set forth in Minnesota Rules 7829.1400."

Minnesota Power, Otter Tail Power, and Xcel recommended applying these same procedural requirements to those who seek to modify or delay any of the other three standards subject to modification or delay. But given that 16 years have passed since the 2010 Order was issued, Xcel argued that it is no longer necessary to include the "at least initially" language.

CEOs also recommended establishing uniform procedural requirements for seeking a modification or delay of any of the relevant standards—but recommended granting more time than Minnesota Rules 7829.1400 provides for filing comments and replies. In support of its request, CEOs argued that a petition to modify or delay compliance with a standard would represent an important deviation from the legislature's goals, would require analyzing compliance with a wide range of statutory requirements, and may trigger the need for sophisticated computer modeling—all factors that would justify an extended procedural schedule. Accordingly, CEOs recommended granting 60 days for anyone to comment on a request for modification or delay, and 30 days for the petitioner to then reply to those comments.

In the interest of simplicity, the Commission will establish uniform baseline procedural requirements for petitions seeking to modify or delay any of the four applicable standards. The Commission is persuaded that the extended timeline proposed by CEOs will better accommodate the analytical requirements that a petition for modification or delay would trigger. Finally, the Commission agrees with Xcel that these instructions no longer require the phrase "at least initially." The Commission will adopt these changes as set forth in the ordering paragraphs below.

6. Appropriate docket in which to seek a modification or delay

The Commission has not restricted the type of docket a petitioner must use to seek a modification or delay of the Renewable Energy Standard/Eligible Energy Technology Standard, Solar Energy Standard, Distributed Solar Energy Standard, or Carbon-Free Standard. That said, commentors generally acknowledge the merits of addressing petitions for modification or delay in the context of a resource planning docket under Minn. Stat. § 216B.2422, because these dockets analyze the cost and benefits of alternative strategic plans for the utility.

To encourage the use of resource planning dockets for this purpose, CEOs and Minnesota Power recommended that the Commission decline to consider any such petitions filed outside of a resource planning docket unless the request was driven by circumstances beyond the petitioner's control—and more specifically, the circumstances identified in the Renewable Energy Objectives statute, subdivision 2b, items 5 – 8:

> (5) delays in acquiring sites or routes due to rejection or delays of necessary siting or other permitting approvals
> (6) delays, cancellations, or nondelivery of necessary equipment for construction or commercial operation of an eligible energy technology facility
> (7) transmission constraints preventing delivery of service
> (8) other statutory obligations imposed on the commission or a utility

In addition, CEOs argued that if a utility has a duty to engage in resource planning, and if that utility petitions for a modification or delay outside the context of its resource plan, then the utility should have to explain why it failed to identify the need for a modification or delay when it was preparing its last resource plan.

The Commission concurs with the arguments and proposals set forth by the commentors, and so will adopt them as set forth in the ordering paragraphs below. As the commentors noted, it is challenging to imagine how parties or the Commission could fully evaluate a petition to modify or delay implementation of a Standard in the absence of the kind of record created by a resource planning docket. Nevertheless, the Commission remains open to the possibility that unforeseeable circumstances could justify a petition from a utility before its next resource plan is due.

The Commission has yet to rule on whether a party not subject to the requirements of Minn. Stat. § 216B.1691, subd. 2b, could successfully petition to have the Commission modify or delay the application of a Standard. But the Commission is persuaded that the private interest of such a party in securing an emergency modification or delay must be subordinated to the public interest in ensuring that such a petition be evaluated in the context of an adequate record. And that record can only be found in a resource planning docket. Accordingly, the Commission will decline to consider petitions to modify or delay the application of a Standard when filed by any party other than a utility pursuant to Minn. Stat. § 216B.1691, subd. 2b—unless that petition is filed in the utility's resource planning docket.

7. Evaluating the effects of the Standards on rates and reliability

In Ordering Paragraph 7 of the 2010 Order, the Commission stated that it could use a variety of dockets for the purpose of evaluating the effects of the Standards on rates and reliability. In the order's text the Commission noted that the consequences on rates could be addressed in rate cases, applications to build new facilities (Certificate of Need dockets), dockets to approve contracts to buy electricity from other generators, and dockets to recover the cost for transmission facilities or for electricity from renewable sources. The Commission further noted that it could monitor the reliability of a utility's electric service in the context of biennial transmission filings, the annual reliability reporting requirements of Minn. Rules Chapter 7826, resource planning dockets, and regional reliability organizations. These findings notwithstanding, the Commission stated that it preferred analyzing how environmental regulations affect rates and reliability in the context of a resource plan.

Xcel argued that Ordering Paragraph 7 was no longer required and could be deleted.

Reviewing the 2010 Order, the Department maintained that the Commission has adequate forums for scrutinizing how environmental regulations affect rates and reliability, and concluded that nothing additional is required.

Minnesota Power did not dispute the Department's position, but argued for clarifying that a resource planning docket provides the preferred forum for analyzing how the Renewable Energy Objectives affect a utility's rates and reliability, and how compliance may create other technical challenges.

In contrast to the other commentors, MLIG offered a number of detailed recommendations for tracking the consequences of the Renewable Energy Objectives for rates and reliability, and for revising the Commission's findings in its 2015 Order. That order addresses tracking consequences created by the Renewable Energy Standard and the Solar Energy Standard, but does not address the Distributed Solar Energy Standard or the Carbon-Free Standard. No other commentor responded to these recommendations.

For purposes of the current docket, the Commission concurs with Minnesota Power that the language of Ordering Paragraph 7 could be refined. The Commission will clarify that resource planning dockets are the preferred forum for addressing how the Renewable Energy Objectives and its Standards affect a utility's rates and reliability, and how compliance with the statute may pose new technical challenges. The Commission agrees that it can omit the language's reference to Section V of the 2010 Order, which discusses the variety of forums for evaluating costs and reliability. And the Commission will update the references to Standards and tradeable credits, as the Commission has approved for the other ordering paragraphs.

Otherwise, the Commission acknowledges that MLIG has identified a larger range of topics for analysis than the Commission—or, apparently, the other commentors—had envisioned. Given the scope of the matters raised, the Commission will defer acting on MLIG's requests until the matter has received greater scrutiny in its own docket. Accordingly, the Commission will delegate to its Executive Secretary the authority to begin proceedings to review its 2015 Order to examine whether the order adequately covers all of the Standards set forth in the Renewable Energy Objectives.

8. Evaluating compliance with the Standards

In Ordering Paragraph 10 of the 2010 Order, the Commission set forth factors it would consider when evaluating a utility's compliance with the Renewable Energy Standards—including "[t]he factors articulated in its [2004 Order] for evaluating compliance with the Renewable Energy Objectives."

Minnesota Power stated that the 2004 Order deals with evaluating a utility's good-faith efforts to comply with the objectives then set forth in the statute, and argued that this language was no longer relevant to the Renewable Energy Objectives statute as it now exists. No commenter disputed this claim.

The Commission concurs and will therefore discontinue giving consideration of the factors in the 2004 Order.

IV. Duration of Tradeable Credits

In general, the Commission has established that a utility may demonstrate compliance with Standards by retiring tradable energy credits, provided the credits are retired in the year they were generated or the following four years. When the federal government announced that it would soon reduce the production and tax credits offered for new sources of electric generation, the Commission sought to offer added incentives for people to build generation that would qualify for the remaining credits. So in its August 2025 Order the Commission declared that people developing new projects that qualified for these federal production and tax credits could earn tradeable credits that would not expire before January 2032.

CMPAS asked the Commission to expand the list of projects that could qualify for these longer-life tradeable credits—specifically, to add any wind farm (collection of wind turbines) that began operating before 2008, generates no more than 20 megawatts, and by 2027 will benefit from at least one of a list of "substantial actions" related to extending the wind farm's service life. Most of these substantial actions refer to repowering (investing capital to upgrade or otherwise rejuvenate) the facilities. According to CMPAS, many of these facilities might qualify for federal tax credits, but some might not. Either way, CMPAS argued that offering the longer-life tradeable credits would help make these projects cost-effective.

No commentors opposed this proposal.

The Commission will grant CMPAS's request in part. The Commission offered its longer-life tradeable credits to provide an added incentive for developers to take action to secure federal production and tax credits before they expire. Where a developer pursues a project to repower a facility that would qualify to receive tradeable credits, and that facility also qualifies to receive federal tax credits, the Commission agrees that this project should also qualify to receive the longer-life tradeable credits. Because that outcome would be consistent with the Commission's purpose in offering those credits, the Commission will revise its holding from the August 2025 Order accordingly. But projects that do not qualify for federal tax credits fall outside the scope of that order, and for now the Commission will decline to revise that scope to encompass such projects.

The Commission will so order.

ORDER

1. In lieu of Ordering Paragraphs 4-10 of its Order Clarifying Criteria and Standards for Determining Compliance Under Minn. Stat. § 216B.1691 (March 19, 2010) in Docket No. E-999/CI-03-869, *In the Matter of Detailing Criteria and Standards for Measuring a Utility's Good Faith Efforts in Meeting the Renewable Energy Objectives Under Minn. Stat. § 216B.1691*, the Commission orders as follows:

   A. The Commission clarifies that a petition to modify or delay a Standard under Minn. Stat. § 216B.1691 may be filed at any time, subject to the following restrictions.

      1) Petitions to modify or delay a Standard governed by Minn. Stat. § 216B.1691, subd. 2b, must be filed in the context of a resource planning docket under Minn. Stat. § 216B.2422, unless the petitioner is a utility subject to the requirement to file resource plans.

      2) A utility subject to the requirement to file resource plans may petition for a modification or delay outside of a resource planning docket, but —

         a) should do so only for the reasons established in Minn. Stat. § 216B.1691, subd. 2b (5-8), and

         b) the petition should explain why the need for modification or delay was not foreseen in the utility's resource plan filing.

   B. Any petition to modify or delay a Standard under Minn. Stat. § 216B.1691 must include the following information:

      1) a discussion of the reasons for concluding that compliance cannot be achieved by buying Renewable Energy Credits, Solar Renewable Energy Credits, Alternative Energy Credits, Environmental Attribute Credits, or equivalent attributes allowed by statute or Commission order (such as the carbon-free percentage of the utility's annual net market purchases), where applicable;

      2) a plan for future compliance, as required under Minn. Stat. § 216B.1691, subd. 2b(e); and

      3) the time frame within which the petitioner requests Commission action.

   C. Petitions to modify or delay any Standard under Minn. Stat. § 216B.1691 must —

      1) comply with the service and filing requirements of Minnesota Rules 7829.1300, and

2) follow the procedural track set forth in Minnesota Rules 7829.1400, except that the comment period will be extended to sixty days and the reply comment period will be extended to thirty days.

D. The Commission clarifies that resource planning dockets are the preferred proceedings to track rate impacts, reliability, and technical challenges caused by compliance with the Standards under Minn. Stat. § 216B.1691. For utilities that are not required to file resource plans, the Commission will accept voluntary filings on the rate impact of the Standards under Minn. Stat. § 216B.1691 in the biennial compliance reports.

E. The Commission clarifies that it favors forward-looking, long-term cost information when analyzing the rate impacts of the Standards under Minn. Stat. § 216B.1691 but will not preclude other types of cost information from being presented by the parties.

F. The Commission clarifies that intervenors in a resource plan proceeding who request information related to the rate impact of future compliance with Standards under Minn. Stat. § 216B.1691 are making a reasonable request for information under Minn. Rules, part 7843.0300, subp. 8, and that utilities must promptly respond.

G. The Commission clarifies that it will evaluate compliance with any Standard under Minn. Stat. § 216B.1691 on a case-by-case basis, but will also consider the factors set forth below:

1) Whether the utility brought the noncompliance to the attention of the Commission in a timely manner.

2) Whether Renewable Energy Credits, Solar Renewable Energy Credits, Alternative Energy Credits, equivalent Environmental Attribute Credits, or equivalent carbon-free attributes allowed by statute or Commission order, where relevant, are available for purchase, and at what price.

2. In lieu of Ordering Paragraph 2 of the Commission's Order Extending Credit Duration for Expedited Projects and Requiring Filings (August 7, 2025) in Docket No. E-999/CI-23-151, *In the Matter of an Investigation into Implementing Changes to the Renewable Energy Standard and the Newly Created Carbon Free Standard under Minn. Stat. § 216B.1691*, the Commission orders as follows:

Prospectively, if a utility meets its obligations under the Renewable Energy Objectives of Minn. Stat. § 216B.1691 using Renewable Energy Credits, Alternative Energy Credits, or equivalent Environmental Attribute Credits from a facility that —

1) began construction after July 4, 2026, and was placed in service by December 31, 2027, or

2) began construction before July 5, 2026, and was placed in service within four years after construction began, or

3) was repowered and qualified for federal tax credits,

then those credits will not expire until four years after generation, and in no case before January 2034.

3. The Commission delegates to the Executive Secretary authority to begin proceedings to review its Order Establishing Uniform Reporting System for Estimating Rate Impact of Minn. Stat. § 216B.1691 (January 6, 2015), issued in Docket No. E-999/CI-11-852, *In the Matter of Utility Renewable Energy Cost Impact Reports Required by Minnesota Statutes Section 216B.1691, Subd. 2e*, to ensure that the order adequately covers all Renewable Energy Objectives Standards.

4. This order shall take effect immediately.

BY ORDER OF THE COMMISSION

Sasha Bergman
Executive Secretary
