Direct Testimony and Schedules Brian E. Kage

## Before the Minnesota Public Utilities Commission State of Minnesota

In the Matter of the Application of Minnesota Energy Resources Corporation for Authority to Increase Rates for Natural Gas Service in Minnesota

Docket No. G011/GR-13-617

Exhibit \_\_\_\_\_

**Test Year Revenue Requirements** 

September 30, 2013

# **TABLE OF CONTENTS**

| I.   | Introduction and Qualifications | 1 |
|------|---------------------------------|---|
| II.  | ICE 2016                        | 3 |
| III. | Conclusion                      | 9 |

| 1  |    | I. INTRODUCTION AND QUALIFICATIONS  |
|----|----|---|
| 2  | Q. | PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.  |
| 3  | A. | My name is Brian E. Kage. My business address is Integrys Business Support LLC            |
| 4  |    | ("IBS"), 700 North Adams Street, P.O. Box 19001, Green Bay, WI 54307-9001.                |
| 5  |    |   |
| 6  | Q. | BY WHOM ARE YOU EMPLOYED AND WHAT IS YOUR POSITION?                                       |
| 7  | A. | I am the General Manager of Strategy and Business Performance of Integrys Energy          |
| 8  |    | Group, Inc. ("Integrys"). Both IBS and Minnesota Energy Resources Corporation             |
| 9  |    | ("MERC") are wholly-owned subsidiaries of Integrys.                                       |
| 10 |    |   |
| 11 | Q. | PLEASE SUMMARIZE YOUR QUALIFICATIONS AND EXPERIENCE.                                      |
| 12 | A. | I graduated from Texas Christian University with a Bachelor of Business Administration    |
| 13 |    | in Finance. I began my career with Integrys in January 2007 as Value Manager in the       |
| 14 |    | Corporate Development area. In April 2008, I assumed my current position as General       |
| 15 |    | Manager of Strategy and Business Performance in the Customer Relations department.        |
| 16 |    | Prior to working for Integrys, I worked for Accenture and Black & Veatch where I          |
| 17 |    | provided services for North American and International utilities in the areas of Customer |
| 18 |    | Operations & Application Strategy, Merger & Acquisitions Value Capture, and CIS           |
| 19 |    | implementations.  |
| 20 |    |   |
| 21 | Q. | FOR WHOM ARE YOU PROVIDING TESTIMONY?   |
| 22 | A. | I am providing testimony on behalf of MERC.   |
| 23 |    |   |

| 1  | Q. | WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THIS PROCEEDING?                                  |
|----|----|--|
| 2  | A. | The purpose of my pre-filed direct testimony is to describe the Integrys Customer          |
| 3  |    | Experience ICE 2016 ("ICE 2016") project, as well as the Intangible Benefits of the ICE    |
| 4  |    | 2016 project to MERC and the other five Integrys regulated utilities.                      |
| 5  |    |  |
| 6  | Q. | ARE YOU SPONSORING ANY EXHIBITS IN CONNECTION WITH YOUR                                    |
| 7  |    | TESTIMONY IN THIS PROCEEDING?  |
| 8  | A. | Yes, I am. I am sponsoring Exhibit(BEK-1), consisting of 3 pages.                          |
| 9  |    |  |
| 10 | Q. | WAS THIS EXHIBIT PREPARED BY YOU OR UNDER YOUR DIRECTION AND                               |
| 11 |    | SUPERVISION?   |
| 12 | A. | Yes, it was.   |
| 13 |    |  |
| 14 | Q. | PLEASE PROVIDE A HIGH LEVEL EXPLANATION OF YOUR EXHIBIT.                                   |
| 15 | A. | Yes. Exhibit (BEK-1) summarizes the various cost and savings inputs to the                 |
| 16 |    | economic analysis used to evaluate the various options considered for the ICE 2016         |
| 17 |    | project. These values were used in the economic analysis described in the pre-filed direct |
| 18 |    | testimony of Mr. Michael E. Gerth.   |
| 19 |    |  |
|    |    |  |

| 1        |    | II. ICE 2016   |
|----------|----|--|
| 2        |    |  |
| 3        | Q. | WHAT IS THE ICE 2016 PROJECT?  |
| 4        | A. | The ICE 2016 Project intends to unify the various billing systems currently in use across    |
| 5        |    | the Integrys platform. The Integrys family of six regulated utilities currently operate with |
| 6        |    | three distinct billing systems:  |
| 7        |    | 1. The "Open-C" system for Wisconsin Public Service Corporation ("WPSC")                     |
| 8        |    | and Upper Peninsula Power Company ("UPPCO"),   |
| 9<br>10  |    | 2. The "Vertex" system for MERC and Michigan Gas Utilities Corporation                       |
| 11       |    | ("MGUC"), and  |
| 12<br>13 |    | 3. The "C-First" system for The Peoples Gas Light and Coke Company ("PGL")                   |
| 14       |    | and North Shore Gas Company ("NSG").   |
| 15       |    |  |
| 16       |    | The ICE 2016 Project will result in a single billing system for all six Integrys regulated   |
| 17       |    | utilities.   |
| 18       |    |  |
| 19       | Q. | OTHER THAN PROVIDING A SINGLE BILLING SYSTEM FOR ALL SIX                                     |
| 20       |    | INTEGRYS REGULATED UTILITIES, WHAT OTHER FEATURES AND BENEFITS                               |
| 21       |    | RESULT FROM THE ICE 2016 PROJECT?  |
| 22       | A. | The ICE 2016 Project will provide significant tangible and intangible benefits to MERC       |
| 23       |    | and the other Integrys regulated utilities. Intangible benefits include improved efficiency  |

| 1        | and productivity as a result of converting from the current MERC Customer Information        |
|----------|--|
| 2        | System ("CIS") technology platform (Vertex) onto the Open-C technology platform.             |
| 3        |  |
| 4        | One of the most important benefits of the ICE 2016 Project is that it will provide overall   |
| 5        | standardization of internal delivery processes and system technology platforms which         |
| 6        | will improve customer satisfaction, increase productivity, and increase efficiency by        |
| 7        | lowering overall operating costs.  |
| 8        |  |
| 9        | Next, the ICE 2016 Project will improve and enhance the features of our Billing,             |
| 10       | Collections, Call Center, and Self-Service related offerings by ensuring that these          |
| 11       | functions are staffed appropriately to continue to leverage the opportunities of a large     |
| 12       | corporation, while maintaining the high level of service of a local utility.                 |
| 13       |  |
| 14       | Further, the ICE 2016 Project will provide a standardized process architecture and           |
| 15       | technology platform that will enable the Integrys regulated utilities to achieve and sustain |
| 16       | first quartile performance in cost management (cost per customer), customer satisfaction,    |
| 17       | and service quality for the Billing, Collections, Call Center, and Self Service functions.   |
| 18       | Specifically, the benefits of this project include improved customer experience through      |
| 19       | implementation of several improvements to our Interactive Voice Response ("IVR") and         |
| 20       | web self-service channels that will increase our customer's use of these channels, and       |
| 21       | reduce the number of inbound calls to our call centers. These improvements include:          |
| 22<br>23 | • The automation of customer turn-offs,  |

-4-

| 1<br>2                     | • The ability to schedule service appointments,   |
|----------------------------|---|
| 3<br>4                     | • Improved use of bill analyzer tools,  |
| 5<br>6                     | • Providing customers with web access to their bill image,  |
| 7<br>8                     | • Several usability type improvements, and  |
| 9<br>10<br>11              | • Consolidating all utilities onto a single web, telephone and IVR platform.  |
| 12                         | Several improvements that will increase our first call resolution and customer satisfaction   |
| 13                         | include:  |
| 14<br>15                   | • An improved call center agent on-line encyclopedia,   |
| 16<br>17                   | • Deployment of a First Call Resolution analytical tool,  |
| 18<br>19                   | • Improved call center Q&A and agent monitoring, and  |
| 20<br>21                   | • An improved complaint identification and resolution process.  |
| 22                         | Other functions that ICE 2016 will provide include:   |
| 23<br>24<br>25<br>26<br>27 | • Deployment of a Credit Model which improves collections<br>performance through implementation of a customer behavioral/risk<br>score that will help to improve the efficiency and effectiveness of our<br>collection actions, |
| 28<br>29<br>30<br>31       | • Improved collection schedules that will work in conjunction with the customer behavioral/risk score to further ensure increased effectiveness of our collection actions,  |

| 1<br>2<br>3<br>4<br>5 |    | • Ii<br>d<br>v<br>a | mproved enrollment processes for new customers that will secure<br>leposits for high risk customers, and implement additional steps to<br>verify customer identity, thereby reducing the number of fraudulent<br>applications, |
|-----------------------|----|---------------------|--|
| 6<br>7<br>8           |    | • T<br>n            | The reporting of customer payment behavior, both positive and negative, to the Credit Bureaus, and   |
| 9<br>10<br>11         |    | • I:<br>f:          | mproved processes for locating and contacting customers who have inalized their account.   |
| 12                    |    | Finally, ICE 2016 w | vill provide improved Billing and Payment related performance by   |
| 13                    |    | continuing to imple | ment our strategy for:   |
| 14<br>15              |    | • I:                | ncreased e-Bill adoption,  |
| 16<br>17              |    | • N                 | Making improvements in the Bill Estimation routine,  |
| 18<br>19<br>20        |    | • I:<br>c           | mproving our bill printing, document imaging, and document storage apabilities,  |
| 21<br>22<br>23<br>24  |    | • F<br>a<br>n       | Providing real-time electronic payment information to our Call Center<br>and Self Service channels to improve the customer reconnection for<br>nonpayment process, and   |
| 25<br>26              |    | • A                 | Automating the Non-Sufficient Funds check process with our banks.  |
| 27                    | Q. | WHAT OPTIONS        | WERE CONSIDERED FOR THE ICE 2016 PROJECT?  |
| 28                    | A. | Option 1 assumed In | ntegrys would consolidate from the current three CIS platforms and   |
| 29                    |    | associated business | operating models to one enhanced Open-C platform that will support   |
| 30                    |    | standardized busine | ess processes for all six regulated utilities by 2016. Open-C is the CIS   |

| 1  |    | currently used by Integrys affiliates WPS Corp and UPPCO. This is known as the "3 to 1  |
|----|----|---|
| 2  |    | Option."  |
| 3  |    |   |
| 4  |    | Option 2 assumed Integrys would consolidate from three to two CIS platforms: Open-C     |
| 5  |    | for all Integrys utilities except PGL and NSG, which would remain on their currently    |
| 6  |    | existing CIS known as C-First. Option 2 was assumed to be completed by 2015. This is    |
| 7  |    | known as the "3 to 2 Option."   |
| 8  |    |   |
| 9  |    | Option 3 assumed Integrys would first consolidate from three to two CIS platforms (same |
| 10 |    | as Option 2) by 2015, and then move to one CIS platform (Open-C) by 2018. This is       |
| 11 |    | known as the "3 to 2 to 1 Option."  |
| 12 |    |   |
| 13 | Q. | HOW WERE THE VARIOUS COSTS USED IN THE ECONOMIC ANALYSIS                                |
| 14 |    | DERIVED?  |
| 15 | A. | For the 3 to 1 Option, the various costs were developed during a Business Requirements  |
| 16 |    | Design phase which designed all Customer Operations related processes and the           |
| 17 |    | requirements necessary to implement those processes. Those requirements were then       |
| 18 |    | analyzed to determine the technology changes necessary to implement those processes     |
| 19 |    | across all six utilities. In addition, the necessary change management impacts were     |
| 20 |    | analyzed and estimated.   |
| 21 |    |   |
| 22 |    | For the 3 to 2 Option, the various costs were developed by limiting the scope to        |
| 23 |    | converting MERC and MGUC to the same platform as WPS Corp and UPPCO (i.e.,              |
|    |    | -/-   |

| 1  |    | Open-C), while PGL and NSG would remain on their existing platform (i.e., C-First).        |
|----|----|--|
| 2  |    | Limited changes to the processes in Open-C would be made to accommodate MERC and           |
| 3  |    | MGUC.  |
| 4  |    |  |
| 5  |    | For the 3 to 2 to 1 Option, the costs for the 3 to 1 option were analyzed to determine the |
| 6  |    | impact of an elongated schedule and two distinct implementations.                          |
| 7  |    |  |
| 8  | Q. | HOW WERE THE COST SAVINGS FROM THE ECONOMIC ANALYSIS                                       |
| 9  |    | DERIVED?   |
| 10 | A. | The technology and operational costs for our current state customer operations were        |
| 11 |    | modeled over a 15 year period from 2012-2026. For each of the three different options      |
| 12 |    | analyzed, the reductions in O&M and Capital expenditures was determined and applied        |
| 13 |    | in the appropriate year. For on-going savings, they were inflated by 2.7% from the year    |
| 14 |    | identified to 2026.  |
| 15 |    |  |
| 16 |    | The various costs and savings for each option are summarized on Exhibit(BEK-1).            |
| 17 |    |  |
| 18 |    | MERC's O&M costs associated with the 2014 projected test year are included in              |
| 19 |    | Exhibit(SSD-2), which are sponsored by Mr. Seth DeMerritt.                                 |
| 20 |    |  |
| 21 |    |  |

| 1 |    | IX. CONCLUSION   |
|---|----|--|
| 2 | Q. | DOES THIS CONCLUDE YOUR DIRECT TESTIMONY ON THE ICE 2016 |
| 3 |    | PROJECT?   |
| 4 | A. | Yes, it does.  |

## Integrys Energy Group, Inc. ICE 2016 Project Inputs Into Summary of Calculations of Net Present Value of Revenue Requirement ("NPVRR")

### **Option 1- Conversion from 3 Customer Information Systems to 1 by 2016**

| Cost To Achieve - Capital                |       |                     |
|--|-------|---------------------|
| Hardware                                 |       | \$<br>3,201,000     |
| Software                                 |       | 5,285,000           |
| Miscellaneous Inv. & Exp                 |       | 5,208,000           |
| Internal Labor                           |       | 16,405,000          |
| External Labor                           |       | 34,237,000          |
|  | Total | \$<br>64,336,000    |
| Cost To Achieve - O&M                    |       |                     |
| Hardware                                 |       | \$<br>-             |
| Software                                 |       | 883,000             |
| Miscellaneous Inv. & Exp                 |       | 870,000             |
| Internal Labor                           |       | 4,255,000           |
| External Labor                           |       | 6,392,000           |
|  | Total | \$<br>12,400,000    |
| Undiscounted Estimated Savings - Capital |       |                     |
| Hardware                                 |       | \$<br>(16,709,000)  |
| Software                                 |       | (255,000)           |
| Miscellaneous Inv. & Exp                 |       | (227,000)           |
| Internal Labor                           |       | (3,064,000)         |
| External Labor                           |       | (4,595,000)         |
|  | Total | \$<br>(24,850,000)  |
| Undiscounted Estimated Savings - O&M     |       |                     |
