Dr. Burl W. Haar Executive Secretary Minnesota Public Utilities Commission 121 7th Place East, Suite 350 St. Paul. MN 55101-2147

RE: CenterPoint Energy Resources Corp.,

d/b/a CenterPoint Energy Minnesota Gas (CenterPoint Energy)

2012 Annual Service Quality Report

Docket No. G-008/M-14-316

Dear Dr. Haar:

Enclosed is CenterPoint Energy's Annual Service Quality Report for 2013, in compliance with the reporting requirements in the Minnesota Public Utilities Commission ("Commission") Order dated August 26, 2010 in Docket No. G-999/CI-09-409.

Additional information is provided in compliance with the Commission's Orders on March 15, 2010 in Docket No. G-008/M-09-1190 and March 6, 2012 in Docket No. G-008/M-10-378.

Please contact me at (612) 321-5140 if you have any questions about this filing.

Sincerely,

/s/

Pam Thomas Regulatory Analyst

1 Customer Service

1.1 Call Center Response Time

The Call Center Response Time metric provides the percentage of calls answered within 20 seconds.

Call Center Response times are reported on Schedule 1.

CenterPoint Energy's goal is to achieve an 80/20 service level for a 12 month, calendar basis. We rely on historical trends for call volumes, attrition, absences, as well as any changes in off-the-phone work or other known factors in attempting to achieve an overall 80/20 service. There will be month-to-month variations based on actual events and call volume.

In 2013, 81% of calls (excluding IVR-only calls) were answered in 20 seconds or less, compared to 81% in 2012. The weighted average speed of answer was 25 seconds in 2013, compared to an average of 25 seconds in 2012. The number of calls answered (excluding IVR) increased from 798,637 in 2012 to 854,898 in 2013.

At the request of the utility workgroup the Commission tasked with improving consistency in reporting in its March 6, 2012 Order, the Company will also report on call center response time including calls that solely utilized IVR functionality.

In 2013, 88% of calls (including IVR-only calls) were answered in 20 seconds or less, compared to 88% in 2012. The weighted average speed of answer was 16 seconds in 2013, compared to an average of 17 seconds in 2012. The total number of calls answered (including IVR) increased from 1,171,297 in 2012 to 1,330,798 in 2013.

1.2 Meter Reading Performance

The Meter Reading Performance reporting metric provides a detailed report on CenterPoint Energy's meter reading performance, including, for each customer class and for each calendar month:

- A. The number and percentage of customer meters read by utility personnel;
- B. The number and percentage of customer meters self-read by customers;

- C. The number and percentage of customer meters that have not been read by utility personnel for periods of six to 12 months and for periods of longer than 12 months, and an explanation as to why they have not been read; and
- D. Data on monthly meter reading staffing levels, by geographical area.

The Order accepting our 2010 Service Quality Report states:

Require the utilities to explain, in their 2011 annual reports, whether the difference between the total percentage of meters (100%) and the percentage of meters read (by both the utility and customers) is equal to the percentage of estimated meter reads.

As explained in our 2011 report, the difference between the total percentage of meters and the percentage of meters read by the utility or its customers is the number of billings with estimates; this includes, but is not limited to, estimated meter readings, billing adjustments, and rebilling.

Meter Reading Performance is reported on Schedule 2.

In 2013, 98.21% of meters were read by CenterPoint Energy personnel, compared to 98.19% in 2012. About 0.02% of meters were not read in 6-12 months, compared to about 0.02% in 2012. About 0.01% of meters were not read in over 12 months, compared to about 0.01% in 2012. Average staffing levels decreased from 10.0 in 2012 to 9.5 in 2013 for the Minneapolis Metro Area, average staffing levels also decreased from 17.0 in 2012 to 16.5 in 2013 for Greater Minnesota.

1.3 Involuntary Disconnection

CenterPoint Energy has included a summary of the monthly reports that are submitted pursuant to Minnesota Statutes §§ 216B.091 and 216B.096, subdivision 11 in Docket No. E,G 999/PR-11-2.

A summary of involuntary disconnection reporting is included on Schedule 3.

There were 30,347 customers disconnected for nonpayment in 2013, compared to 26,573 in 2012.

1.4 Service Extension Request Response Times

The reporting metric includes service extension request response times, including, for each customer class and each calendar month:

- A. The number of customers requesting service to a location not previously served by the utility and the intervals between the date service was installed and the later of the in-service date requested by the customer or the date the premises were ready for service; and
- B. The number of customers requesting service to a location previously served by the utility, but not served at the time of the request, and the intervals between the date service was installed and the later of the in-service date requested by the customer or the date the premises were ready for service.

The Order accepting our 2010 Service Quality Report states;

Require the utilities to explain, beginning with their 2011 annual reports, the types of extension requests (such as requests for reconnection after disconnection for non-payment) they are including in their data on service extension request response times for both locations not previously served, as well as for locations that were previously served.

CenterPoint Energy includes the following types of extension request in our data on service extension response times:

Part A – New Service Extensions

- 1. Location never had service, new construction
- 2. Location never had service, existing home

Part B – Renewed Service Extensions

- 1. Location previously had service, same customer where the customer requested the disconnection
- 2. Location previously had service, new customer

In CenterPoint Energy's July 10, 2012 response to the Minnesota Department of Commerce's Comments in Docket No. G-008/M-12-425 regarding service extension request response times, the Company stated:

In reviewing the Department's comments, we discovered that the data on renewed service orders was not reported the same way as new service orders. For renewed services, the 'site ready' status was not always changed when the work was dispatched so the time to complete the work may have been overstated; as such, the data is not comparable to new orders. We are evaluating the current processes and will make changes to better capture the 'site ready' date which will be reflected in future service quality reports.

In response to that process assessment, the Company revised reporting methods so new and renewed service orders would be consistently comparable; starting in 2012, the "Avg days to complete" field represents the difference between the dispatched date and mobile completion date.

Service Extension Request Response Time reporting is on Schedule 4.

New residential extensions took an average of 8 days to complete in 2013 and an average of 6 days to 2012. Renewed residential extensions took an average of 10 days to complete in 2013 and an average of 7 days in 2012.

New commercial extensions took an average of 9 days to complete in 2013 and an average of 11 days in 2012. Renewed commercial extensions took an average of 10 days to complete in 2013 and an average of 8 days in 2012.

1.5 Customer Deposits

The reporting metric includes the number of customers who were required to make a deposit as a condition of receiving service.

The Order accepting our 2010 Service Quality Report states;

Require the utilities to explain, beginning with their 2011 annual reports, the types of deposits (such as new deposits from new and reconnecting customers and the total number of deposits currently held) included in the reported number of "required customer deposits."

CenterPoint Energy reports the number of new deposits required as a condition of service from customers that are liable for disconnection or have been disconnected for non-payment. As of December 31, 2013, a total of 2,185 deposits had been held that were required as a condition of service.

Customer Deposit reporting is included on Schedule 5.

The current policy for deposits is limited to commercial accounts. In 2013, 528 deposits were required as a condition of service for customers, compared to 397 in 2012.

1.6 Customer Complaints

The reporting metrics include a detailed report on complaints by customer class and calendar month including;

- A. The number of complaints received.
- B. The number and percentage of complaints alleging billing errors, inaccurate metering, wrongful disconnection, high bills, inadequate service, and the number involving service-extension intervals, service-restoration intervals and any other identifiable subject matter involved in five percent or more of customer complaints.
- C. The number and percentage of complaints resolved upon initial inquiry, within ten days, and longer than ten days.
- D. The number and percentage of all complaints resolved by taking any of the following actions:
 - 1. Taking the action the customer requested;
 - 2. Taking an action the customer and the utility agree is an acceptable compromise.
 - 3. Providing the customer with information that demonstrates that the situation complained of is not reasonably within the control of the utility.
 - 4. Refusing to take the action the customer requested.
- E. The number of complaints forwarded to the utility by the Commission's Consumer Affairs Office for further investigation and action.

The Order accepting our 2010 Service Quality Report states;

Request that CenterPoint clarify in its 2011 annual report what is included in the following four customer complaint categories: disconnect for non-payment; service order scheduling; inadequate service; and AMB/BBP issue. CenterPoint should also address how these categories correspond with the categories contained in Minn. Rules, part 7826.2000 (B).

CenterPoint Energy has a number of 'complaint categories' which are used to categorize complaints. Many of these categories have been in use for many years; as such, some of the categories used by CenterPoint Energy do not directly correspond to the categories listed in Minn. Rule 7826.2000 that specifies information to which Minnesota Electric Utilities are subject. However, the categories used by CenterPoint Energy allow for comparison over time (i.e., a category is intended to be used for similar types of issues each year). In general, the categories CenterPoint Energy uses are similar to the categories listed in Minn. Rule 7826.2000.

Disconnection Issue: This category is used if the customer calls about disconnection for non-payment including, for example, the customer did not receive disconnect notice, locked before disconnect notice expiration, arrangements on account prior to the account being disconnected, new party living/owning the property, collector locked wrong meter. This category is a subset of Alleged Billing Error as used in Minn. Rules, part 7826.2000 (B).

Service order scheduling: This category is used if the customer calls about some aspect of scheduling a service order including, for example, wait time when scheduling to move the meter from inside the home to outside for a reconnect, wait time on a reconnect when the meter was dug at the street or the main, not satisfied with appointment windows and/or scheduling policies, and missed/late appointment. This category is a subset of Inadequate Service as used in Minn. Rules, part 7826.2000 (B).

Inadequate service: This category is used if the customer calls about the Company failing to meet customer expectations including, for example, excessive hold time on the phone. This category is a subset of Inadequate Service as used in Minn. Rules, part 7826.2000 (B).

Budget Billing Issue: This category is used if the customer calls about the Budget Billing Program (BBP) and they do not understand how the BBP works, they may think it is too high/too low, they have questions how it is calculated, or they don't understand why a payment is required with a credit balance. This category is a subset of Alleged Billing Error as used in Minn. Rules, part 7826.2000 (B).

See also Attachment A where we have 'mapped' the categories CenterPoint Energy uses to the categories listed in Minn. Rule 7826.2000. Additionally, for each category we have provided a general list of the types of situations or questions that may be included in each of the categories that we have been using for many years.

The number of complaints taken by CenterPoint Energy is reported on Schedule 6a.

There were 6,218 complaints received in 2013, compared to 5,000 in 2012.

The number and percentage of complaints by type of complaint is reported on Schedule 6b.

The top three Residential complaint types in 2013 were Disputed Charges, Disconnection Issue and Service Issue; in 2012 the top three were Disputed Charges, Payment Issues, and Service Issue.

The top three Commercial complaint types in 2013 were Disputed Charges, Disconnection Issue and Credit Arrangements; in 2012 the top three were Disputed Charges, Disconnection Issue, and Payment Issues.

The number and percentage of complaints by resolution timeframe is reported on Schedule 6c.

IN 2013, 67% of residential complaints were resolved immediately and 29% within ten days, compared to 61% and 37% in 2012 respectively. For Commercial complaints, 65% were resolved immediately and 30% within ten days, compared to 55% and 40% in 2012, respectively.

The number and percentage of complaints by resolution type are reported on Schedule 6d.

Complaint resolutions were classified as follows: *agreement* between CenterPoint Energy and the customer on the resolution, *compromise* by both the customer and the utility deciding on an acceptable resolution, *demonstration* that the situation complained of is not reasonably within the control of the utility by providing the customer with information, or *refusal* to take the action the customer requested. As shown in the table below, most residential and commercial were resolved by either demonstration or agreement in both 2012 and 2011.

	Resid	ential	Commercial				
Resolution Type	2013	2012	2013	2012			
Agreement	35%	40%	28%	30%			
Compromise	13%	12%	19%	21%			
Demonstration	41%	36%	39%	36%			
Refusal	11%	12%	13%	13%			

The number of complaints forwarded to CenterPoint Energy is reported on Schedule 6e.

There were 250 complaints forwarded to CenterPoint Energy in 2013, compared to 206 in 2012. The number of complaints received from the BBB did not vary much from 2012

to 2013, complaints received from the PUC increased from 77 to 95 and complaints received from the OAG increased from 90 to 118.

1.7 Emergency Line Response Time

The reporting metric is the percent of calls on the emergency line answered within 20 seconds.

Emergency line response times are reported on Schedule 7.

There were 78,629 calls received in 2013 and 69,207 received in 2012. Eighty Five percent (85%) of calls were answered in 20 seconds or less in 2013, compared to 90% in 2012. Using a weighted average, the average speed of answer was 15 seconds, compared to 13 seconds in 2012.

2 Mislocate Rate

The reporting metrics include the total number of mislocates, including the number of times a line is damaged due to a mismarked line or failure to mark a line.

Mislocate metrics are reported on Schedule 8.

The total number of mislocates decreased from 97 in 2012 to 49 in 2013, the number of mislocates per 1,000 tickets also decreased from 0.37 in 2012 to 0.17 in 2013.

3 Gas System Reliability

3.1 Gas System Damages

The reporting metric is the number of damages as reported in the Annual Utility Damage Report to the Minnesota Office of Pipeline Safety. Damages are reported as those under the control of CenterPoint Energy's employees and contractors or other unplanned causes.

Gas System Damages are reported on Schedule 9.

To be consistent with past reporting practices and for ease of comparison with our historical data, we also provide the miles of pipe as of December 31, of the previous year and the annual ratio of damages per 100 miles of pipe.

Gas system damages decreased from 836 in 2012 to 663 in 2013.

3.2 Gas Service Interruptions

The reporting metrics are the number of firm customers that experience an unplanned service interruption and the average duration of the unplanned service interruptions. Unplanned service interruptions are reported as those due to CenterPoint Energy's employees and contractors or other unplanned causes.

Gas service interruptions are reported on Schedule 10.

In 2013 there were 1,073 customers affected by service interruptions; there were 541 outages that lasted 62 minutes per customer on average. In 2012 there were 1,554 customers affected by service interruptions; there were 689 outages that lasted 51 minutes per customer on average.

The decrease in outages correlates to the decrease in damages we had in 2013 compared to 2012. The incidents appear on the Schedule 10 summary of gas service interruptions in the month the investigation is complete. At times, investigations are extensive and take considerable time to process.

3.3 MOPS summaries

The reporting is a summary of major events that are immediately reportable to MOPS according to the criteria used by MOPS to identify reportable events. The reporting also includes summaries of all service interruptions caused by system integrity pressure issues. Each summary shall include the following ten items:

- 1. The location:
- 2. When the incident occurred;
- 3. How many customers were affected;
- 4. How the company was made aware of the incident;
- 5. The root cause of the incident;
- 6. The actions taken to fix the problem;
- 7. What actions were taken to contact customers:
- 8. Any public relations or media issues;
- 9. Whether the customer or the company relighted; and
- 10. The longest any customer was without gas service during the incident.

MOPS summaries are reported on Schedule 11.

In 2013 there were 65 MOPS reportable outages and no integrity outages. In 2012 there were 63 MOPS reportable outages and no integrity outages.

3.4 Emergency Gas Response Times

The reporting metric is the time from the initial notification to the time that a qualified emergency response person arrives at the incident location for purposes of making the area safe. Emergency response times are reported, by metro and outstate, as calls responded to in one hour or less and calls responded to in over one hour. CenterPoint Energy provides number and the percentage of emergencies responded to within one hour and more than one hour. CenterPoint Energy also provides the average number of minutes it takes to respond to an emergency. This same information, in total, is reported in the Emergency Response Report to the Minnesota Office of Pipeline Safety (MOPS).

The Order accepting our 2010 Service Quality Report states:

Require the utilities to describe, beginning with their 2011 annual reports, the types of gas emergency calls included in their gas emergency response times, as well as the types of emergency calls included in their reports to the Minnesota Office of Pipeline Safety (MOPS). Require the utilities to provide an explanation of any difference between the reports provided to the Commission and to MOPS.

The orders that make up this report include all calls received from customers, contractors, passers-by, 911 dispatchers, or company personnel relating to: gas odors, gas leaks, indications of high pressure, fires, explosions incidents, and hit gas lines (either inside or outside). The jobs reported here are the same as are reported to MOPS on their monthly reports.

Emergency Gas Response Times and related MNOPS reports are reported on Schedule 12.

In 2013, 33,522 emergency gas calls were received, compared to 34,481 in 2012. Ninety-two percent (92%) of the calls were responded to in less than one hour, compared to 94% in 2012. In 2013 it took an average of 30.6 minutes to respond to an emergency, compared to 30.0 minutes in 2012.

We continue to monitor emergency response times and to manage our processes and personnel involved in responding to emergency calls.

4 Customer Service Related Expenses

The reporting metric is the total of customer service related operations and maintenance expenses. The report includes only Minnesota-regulated, customer-services expenses based on the costs recorded in CenterPoint Energy's FERC accounts 901 and 903, plus payroll taxes and benefits.

Customer service related expenses are reported on Schedule 13.

Customer service related expenses were relatively unchanged from 2012 to 2013.

5 Relocation Expenses

5.1 Steel Service Line

The reporting metrics include the itemized costs associated with each steel service line relocation. Steel service line relocation expenses are reported on Schedule 14. This report is in compliance with the Commission Order dated March 15, 2010 in Docket No. G-008/M-09-1190. Below is a comparison of the 2013 and 2012 steel service line relocations:

Year	# Jobs	High cost	Low cost	Average Cost
2013	17	\$43,641.01	\$1,070.01	\$6,549.78
2012	10	\$12,509.52	\$280.54	\$4,705.80

The variability of costs is largely due to the unique circumstances of each job.

5.2 Meters at 630 CFH or Greater

The reporting metrics include the itemized costs associated with each relocation of meters rated at 630 cubic feet per hour (CFH) or greater. 630 CFH or greater meter relocation expenses are reported on Schedule 15. This report is in compliance with the Commission Order dated March 15, 2010 in Docket No. G-008/M-09-1190. Below is a comparison of the 2013 and 2012 630 CFH+ meter relocations:

Year	# Jobs	High cost	Low cost	Average Cost
2013	25	\$23,892.47	\$61.15	\$4,049.11
2012	12	\$12,509.52	\$395.64	\$3,145.80

The variability of costs is largely due to the unique circumstances of each job.

6 Additional Customer Service Reporting

6.1 Call Center Detail

The reporting metrics are the total number of utility calls received and the number of utility calls received through CenterPoint Energy's dedicated call center lines. The dedicated call center lines include emergencies, billing inquiries, credit/payment arrangements, service connection/disconnection requests, and the business customer hotline. Call center details are reported on Schedule 16.

The overall call volume increased from 1.17 million in 2012 to 1.33 million in 2013.

6.2 Customer Formal Complaints

The reporting metrics include the total number of resolved and unresolved complaints by class of service and type of complaint, the total number of customers in each class of service, and the total number of customers who initiated service during the past year. CenterPoint Energy currently includes the above information for all complaints (regulated and non-regulated) received from state agencies and the Better Business Bureau, collectively, in its annual report to the Commission, which is required under Minn. Rule 7820.0500. Customer complaints are reported on Schedule 17.

CenterPoint Energy Gas Service Quality Plan 2013 Results Attachment A

Alleged Billing Errors

- **Budget Billing Program (BBP) Issue--** Customers do not understand how the BBP works , they may think it is too high/too low, they have questions how it is calculated, or they don't understand why a payment is required with a credit balance
- Billing Error—Bill Print Issues, questions/issues when we keep the same account number from a
 current or previous address to use for their new address, when an account is not activated into
 the landlords name in a timely manner when the tenant moves out, or when the meter is not
 locked even though the owner has authorized disconnect
- Disputed Charges—Landlord/Tenant Disputes happen when either side say they are not responsible for gas usage for specified time periods. Customer disputes when their responsibility should have ended when the property went thru Foreclosure, Divorce-Roommate situation on who is responsible for a debt accrued at the property when both resided there, Disputed debt transfer is when a debt from a previous address is transferred onto their current account, customers do not want to pay a basic fee on a meter that is not being used, but is not locked, and customers dispute the dates of service(move in/move out dates) or security deposits
- **Payment Issue**—Billmatrix (3rd party vendor who processes our payments) complaint, encoding error, missing payment, incorrect application, processing delay, refund checks, late fee/due date, reconnect payment methods, energy assistance payment, NSF checks, fees, refused check payment, automatic bank draft issues
- Rates/Tariffs—Interim Rates, franchise fees, Conservation Improvement Program, Gas Affordability Program, sales tax, basic charge
- **Decoupling/Inverted Block Rates**—Any complaint pertaining to the Inverted Block Rate (tiered pricing) and/or decoupling
- Inactive/Write Off—collection agency complaint, credit bureau reporting, did not get bill, length of time before the balance is written off

Inaccurate Metering

• **Inaccurate Metering**—Switched piping, pressure factor, misread, non-registering meters, electronic /programming error, meter changes, estimated reads

Wrongful Disconnect

Disconnection Issue —customer did not receive disconnect notice, locked before disconnect
notice expiration, arrangements on account prior to the account being disconnected, new party
living/owning the property, collector locked wrong meter

High Bills

• **High Bill**—Customer initiated complaint regarding a "high bill" for any reason

CenterPoint Energy Gas Service Quality Plan 2013 Results Attachment A

• **Credit Arrangement**—cannot agree/afford to acceptable payment arrangements, ineligible for arrangements due to previous defaulted arrangements

Inadequate service

• Service Issue—Failure to accommodate customer expectations, hold times (phones)

Service-extension intervals-- Service-restoration intervals

- **Construction** —Involves piping leading up to the meter, and the meter itself. Timeline on when a meter can be installed or relocated, excess footage fees, out of season charges-frost burners, cost to add, change or relocate meter, cost to change pressure, meter location, ice shields, barriers, Atmospheric Corrosion Inspection, claims or restoration issues
- Service Order Scheduling—wait time when scheduling to move the meter from inside the home
 to outside for a reconnect, wait time on a reconnect when the meter was dug at the street or
 the main, not satisfied with appointment windows and/or scheduling policies, and missed/late
 appointment

Other—Categories that CNP uses, however they do not fit into one of the above categories

- Employee Conduct—behavioral or driving complaint against an employee
- Online Customer Service—customers do not understand/ agree with options available for My
 Account Online and Online Billing, inconvenience when the website is down for maintenance,
 online accounts that are locked or blocked due to too many failed password attempts
- Other Miscellaneous complaints

Total	3,210	3,210	214	214	214			
For each gas odor/leak notification add one to the appropriate time group and event column when applicable.								

<u>Dispatch</u> - Time interval - The dispatch interval is the time taken from the point of initial notification from a customer, emergency responder or other information source of a gas leak to the time that a company person, who is qualified to make an area safe, begins his commute to respond.

Response -Time interval - The response interval is the cumulative time from the initial notification through the commute to the arrival at the incident location. This time is for a person who is qualified for emergency response and is qualified to begin to make the area safe.

<u>Repair Crew</u> - Time interval - If the first response person is not able to shut off the gas and/or repair the facility, additional help by a "repair crew" may be required. The repair crew interval is the cumulative time from the initial notification through the commute to the arrival time at the incident location.

<u>Gas shut off</u> - Time interval - The gas shut off interval is the cumulative time from the initial notification to the time the gas is shut off. The gas shut off time for small leaks that get scheduled for repair are not included in this report.

<u>Line repaired</u> - Time interval - The line repaired interval is the cumulative time from the initial notification to the time the gas line is repaired, purged and repressurized, so relight(s) can begin. The line repaired time for small leaks that get scheduled for repair are not included in this report.

Total	2,463	2,463	154	154	154
For each gas odor/leak	notification add one	to the appropriate t	ime group and ever	it column when applicab	le.

<u>Dispatch</u> - Time interval - The dispatch interval is the time taken from the point of initial notification from a customer, emergency responder or other information source of a gas leak to the time that a company person, who is qualified to make an area safe, begins his commute to respond.

Response -Time interval - The response interval is the cumulative time from the initial notification through the commute to the arrival at the incident location. This time is for a person who is qualified for emergency response and is qualified to begin to make the area safe.

Repair Crew - Time interval - If the first response person is not able to shut off the gas and/or repair the facility, additional help by a "repair crew" may be required. The repair crew interval is the cumulative time from the initial notification through the commute to the arrival time at the incident location.

<u>Gas shut off</u> - Time interval - The gas shut off interval is the cumulative time from the initial notification to the time the gas is shut off. The gas shut off time for small leaks that get scheduled for repair are not included in this report.

<u>Line repaired</u> - Time interval - The line repaired interval is the cumulative time from the initial notification to the time the gas line is repaired, purged and repressurized, so relight(s) can begin. The line repaired time for small leaks that get scheduled for repair are not included in this report.

Response -Time interval - The response interval is the cumulative time from the initial notification through the commute to the arrival at the incident location. This time is for a person who is qualified for emergency response and is qualified to begin to make the area safe.

Repair Crew - Time interval - If the first response person is not able to shut off the gas and/or repair the facility, additional help by a "repair crew" may be required. The repair crew interval is the cumulative time from the initial notification through the commute to the arrival time at the incident location.

<u>Gas shut off</u> - Time interval - The gas shut off interval is the cumulative time from the initial notification to the time the gas is shut off. The gas shut off time for small leaks that get scheduled for repair are not included in this report.

<u>Line repaired</u> - Time interval - The line repaired interval is the cumulative time from the initial notification to the time the gas line is repaired, purged and repressurized, so relight(s) can begin. The line repaired time for small leaks that get scheduled for repair are not included in this report.

Send report within 30 days of the end of the reporting period to:
