apportionment of renewable energy should reflect each state's percentage of total system sales.

5.E.3 (i) The status of the utility's renewable energy mix relative to the objective & standards.

5.E.3(ii) Efforts taken to meet the objective and standards

5.E.3(iii) Obstacles encountered or anticipated in meeting the objective or standards

Attachment A.5

Minnkota has not encountered any obstacles in meeting the Minnesota Renewable Energy Standard. As of December 31, 2013, the Minnkota and Northern joint system had wind generation that accounted for approximately 30% of its member's retail sales. These wind resources are sufficient to meet the renewable energy mandates in Minnesota.

5.E.3(iv) Potential solutions to the obstacles Not applicable.

5.G. List any renewable generation facilities expected to become operational during the upcoming year

		Capacity	Cap. Factor	Expected Comm'l Operation
Facility Name	type	(MW)	(%)	Date
None*				

* All renewable generation facilities needed to meet Minnesota's renewable energy mandates are in place.

5.K. Identify efforts taken to adequately protect against undesirable economic impacts on ratepayers, including, but not limited to keeping customer's bills and the utility's rates as low as practicable, given regulatory and other constraints.

Minnkota has secured long-term renewable wind purchase contracts that are sufficient to meet the Minnesota mandate requirements each year. However, this has put Minnkota in a surplus situation in the near term with its generation resources, including wind, being greater than its member load for parts of the year. Minnkota has negotiated long-term firm contracts with several regional utilities to sell a portion of its surplus power at higher than short-term market rates. This action has mitigated some of the undesirable economic impacts on the Minnkota/Northern joint system rate payers.
