

Mr. Will Seuffert
Executive Secretary
Minnesota Public Utilities Commission
121 7th Place East, Suite 350
St. Paul, MN 55101-2147

Dear Mr. Seuffert,

ID8 RNG Development is a renewable thermal energy development company that builds, owns and operates assets. We are enabling a transition to cleaner more environmentally responsible energy future. We respectfully submit this letter in support of CenterPoint Energy's proposed interconnection service.

We are currently working with a family-owned dairy farm outside of Wyannett Township, Minnesota to help them achieve their sustainability goals. Part of their vision is to recycle their waste into renewable energy in the form of renewable natural gas. CenterPoint Energy provides gas to the nearby town of Princeton, and we are in discussions with CenterPoint Energy about interconnecting to their system.

Opening CenterPoint Energy's system to renewable natural gas is an important step to helping Minnesota reach its potential for generating renewable energy from waste resources. Farmers looking to transition to renewable sources of energy, and otherwise become more sustainable, need partners to help them turn their waste into an energy resource. For these reasons, ID8 Energy urges the Commission to approve CenterPoint Energy's petition and allow them to bring renewable natural gas onto their system.

Respectfully,

A handwritten signature in black ink, appearing to read 'Beau Griffey', with a long horizontal flourish extending to the right.
