

In the Matter of the Petition by CenterPoint Energy (CPE) to Introduce a Renewable Natural Gas Interconnection Tariff.

Docket No. G008/M-20-434

Commissioner Tuma offers alternative decision options as follows:

7.e: Delete the Renewable Natural Gas Quality Standards (Section 17) from the proposed tariff. Direct CPE to ensure that any biogas interconnection or service is consistent with its obligations to provide safe and reliable service. CPE must maintain on its website the most up-to-date biogas quality standards and testing requirements for those injecting Biogas into the distribution system under their Renewable Natural Gas Interconnection Program.

18. Direct CPE to make a compliance filing within 30 days of the order with a clean tariff, Interconnection Feasibility Study Agreement, and RNG Interconnection Agreement consistent with the decisions in this order, and delegate authority to the Executive Secretary to approve the tariff and agreements along with varying timeline.
